

DIVEBOOKER

Online booking engine for your dive shop's website

divebooker.com

Overview

Divebooker proposes to integrate an online booking engine into your website - so that your guests can conveniently book diving directly from your website.

We specialize in developing tools that help dive shops effectively market their services online and make them available for booking 24/7.

We invite you to install our booking engine on your website for the most cost-effective way to make your services available for booking online.

How it works

1. Create a profile at Divebooker.com

Manage prices and availability of products from your Divebooker account

2. Install booking engine on your website.

Our developers will help to integrate tools for online booking into your website

3. Manage online bookings from different channels in one place.

The screenshot shows a web browser window with the URL `http://yoursite.com`. The page layout includes a navigation bar with a profile icon and menu items. Below the navigation bar, there is a section for "Dates of your diving trip" set to "January 1, 2015 - April 2, 2015", with "Change dates" and "Change currency" options. The main content area features "Special Offers" with three identical "Discover Scuba Dive" packages. Each package is valid during "November 2014 - December 2014" and includes a "31% OFF" discount, "7 nights deluxe accommodations", and "5 days of 2-tank boat dives, all". The price is listed as "from \$60" (with a crossed-out \$600) and includes an "Add to cart" button. A "show 4 more" link is located below the offers. To the right, a "Your Cart" sidebar is empty, displaying the message "Empty Click 'Add to Cart' to start booking" and a list of benefits: "Best Price Guaranteed", "Free Cancellation", and "Pay Later". Payment logos for VISA, MasterCard, AMERICAN EXPRESS, and PayPal are shown at the bottom of the sidebar, along with the text "Cards accepted by Paradiso Escuella diving Center".

Benefits

- True online ecommerce solution - no "email booking forms". A client spends 2 minutes in average from the beginning of the booking till getting an immediate confirmation.
- The technology is designed specially for diving industry and it considers the following features of scuba diving reservation:

Getting important information: diver's level, know before you go information, transfer details

Ability to create various diving products: trips to specific dive sites, courses, diving packages etc

- Possibility to use promo codes for frequent customers
- High security standards of booking process
- You manage your bookings on Divebooker.com and your website in one place
